

Imagineers

Job Description

About Fractal

Fractal Analytics Ltd (BSE: 544700, NSE: FRACTAL) is a globally recognized pure-play enterprise AI company trusted by Fortune 500®-sized enterprises to power decision-making through AI services, solutions, and products, anchored by [Cogentiq](#), its flagship agentic AI platform. With over 6,000 professionals across North America, EMEA, and Asia-Pacific, Fractal partners with business leaders to drive competitive differentiation for their organizations by embedding AI into critical decisions across business functions and industry verticals.

Fractal invests more than 6% of its revenue in AI R&D, supporting foundational AI research, product development, and IP creation that address both immediate client needs and long-term technological advancement. Fractal's track record includes developing proprietary models and products such as [Vaidya.ai](#) and [PiEvolve](#), as well as incubating and spinning out [Qure.ai](#), a global healthcare AI leader focused on the rapid identification and management of tuberculosis, lung cancer, and stroke (or critical health conditions). Fractal's suite of businesses consists of [Asper.ai](#) (a Revenue Growth Management product for CPG companies) and [Analytics Vidhya](#) (an Ed-tech platform).

Campus program: Imagineer

Role

Imagineer would go through a dynamic program offering them variety of projects with exposure to business value chain. This is an opportunity to become a future leader. Join us if you want a career & not a job.

As part of the Imagineer Program, you will undertake a **6-month internship** with Fractal starting in January 2027. During the initial months, you will undergo foundational training, based on which your career track (Data Science, Data Engineering, Decision Sciences) will be determined, considering both your performance and business requirements. You will then receive track-specific training for the remainder of the internship. **Successful completion of the training program is required for conversion to a Full-Time Employee (FTE) role.**

Generic understanding of your role as an Imagineer in each track is as follows:

Data Engineering:

- Work with a team that helps deliver our Data Engineering offerings at a large scale to our Fortune 500 clients worldwide.
- Learn and implement the best of engineering principles to build data pipelines to drive analytical insights leveraging Cloud native stacks and Cloud agnostic stacks (All of cloud services for each of the clouds, Open-source stack like Python, Pyspark etc.)
 - Build data pipelines for both structured and unstructured data for real-time and batch-oriented Systems
 - Build composition-based data solutions leveraging Services oriented and Microservices architecture
 - Build real-time solutions leveraging Digital and IOT data
 - Build Lakehouses and Warehouses
 - Develop next generation warehouse solutions using Knowledge graphs

Data Science:

- Capability to work on independent statistical and machine learning research/projects
- Ability to understand a problem statement and implement analytical solutions & techniques independently
 - Conduct research and prototyping innovations; data and requirements gathering; solution scoping and architecture; consulting clients and clients facing teams on advanced statistical and machine learning problems.
 - Collaborate and Coordinate with different functional teams (engineering and product development) to implement models and monitor outcomes.

Decision Sciences:

- Communicating with the clients and understand their business needs
- Work with large, complex data sets to solve difficult, non-routine analysis problems, applying advanced analytical methods as needed

- Build data pipelines, and dashboards for marketers to self-serve data needs; enable automated tracking of marketing campaigns
- Harmonize data as required and setup models according to the business logic defined
- Use statistical tools to identify and evaluate the relationships between data fields, analyze output and determine the next action

a. Data Visualization (Information Architecture):

- Deliver insight, innovation, and impact to our Fortune 500 clients through predictive analytics and visual storytelling.
- Understand business requirements and address them with conceptualizing and designing of solutions
- Learn and deploy BI solutions with minimal guidance (post training)
- Drive insights from data
- Deliver impact with automations & innovations
- End to end ownership of delivery
- Rigorous documentation & drive operational efficiency with guidance

Perks & Benefits:

- Top 10% performers of the batch would be eligible for 100% sponsorship to PG programs with premier institutes in India
- Insurance Benefits, Relocation Benefits, Gratuity over & above CTC
- Shuttle service to office (select locations only)
- Sabbatical Benefits & loads of people friendly policies
- We serve Breakfast, Lunch & Refreshments for free

Education Qualification: B.Tech. – Circuit Branches

Job location: Mumbai/Bengaluru/Gurgaon/Chennai/Pune/Noida

FTE Joining: Aug/Sept '27

Internship timeline: Jan-June '27

Stipend during internship: INR 30,000 per month

Note: Fractal reserves the right to make changes in the program and the policies time to time.
